WWW.MPPARTS.COM

1843 TUCKER STREET
ROCK HILL, SC 29730

I know how frustrating it can be to have a mixer truck or a concrete plant down. As changes take place in the ready mix concrete industry, you have enough headaches finding mixer technicians and truck drivers. At Mixer & Plant Parts, we understand you want to speak with knowledgeable people who know concrete batch plants and front discharge concrete mixer trucks and how important it is for the right parts to show up at your operation on time every time.

You’ve probably tried to call and place orders with large corporations and wonder if the person on the other end of the phone even understands what you are asking for. You may have even wondered if they even care about you as a human being.

Well, we’ve built Mixer & Plant Parts to deliver the peace of mind you need and to stay “Ready Mix Tough” when customer service is weakening all around you. We’ve built a “Ready Mix Tough” team who is:

- For YOU
- For Each Other
- For the Community - AND -
- For Making a Difference in the World

Meet Jake, Marc, and John who manage the excellent teams in our distribution centers in Grand Rapids, MI, Arlington, TX, and Rock Hill, SC and ensure your parts are assembled, picked, packed and shipped with extraordinary care.

Meet Jamie, the manager of our amazing sales team who have years of experience in the ready mix concrete and heavy duty trucking industry and are here to guide you to the right parts and deliver the peace of mind you and your company deserves. These folks are phenomenal at guiding customers to the right parts for their front discharge mixers, rear discharge mixers, and heavy duty trucks

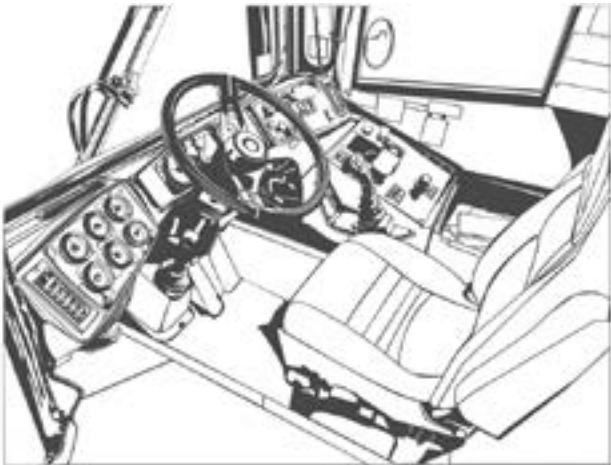

I’m also pleased to introduce Dan, leading a great team in our accounting department who work with your owners and bookkeepers to align our books and to deliver your invoices and statements on time every time.

Also please say hello to our operations, development, marketing, and information technology teams with Hannah, Mandy, Andrew, and myself - who are dedicated to leading our continually MProving organization with generosity and Love...yep...I said Love. Our goal is that in every interaction with MPParts, you’ll feel a sense of belonging, recognition, peace of mind and receive an incredibly remarkable experience you can’t wait to tell your friends and family about.

Brandon Syler - CEO, MPParts
brandon@mpparts.com

WEIGHTS AND MEASURES

UNIT	MAY BE SEEN AS
Feet	Foot, Ft, ‘
Gallon	Gal
Gigabytes	Gigs, Gbs, GB
Holes	Hls, HL
Inches	In, “
Inner Diameter	ID
Leafs	Lf
Length	L, lgth, Long
Liters	L, Ltrs
Millimeters	mm
Ounces	Oz
Outer Diameter	OD
Pieces	Pc, Pcs
Pounds	lbs
Quart	qt
Threads	Thrd
Tons	tonne
Voltage	V
Watts	W

LH/RH is always from driver perspective.
So LH = roadside and RH = curbside

.....

Left Side can be seen as:
Left Side, LS, Left Hand, LH, Roadside, RDSD

.....

Right Side can be seen as:
Right Side, RS, Right Hand, RH, Curbside, CBSD

SPIRAL DUCT FITTING

BRAND	PART #	DESCRIPTION	LINK
C&W	SP012	10in 45 Degree Spiral Duct Pipe Elbow	link

General Purpose RFH durable thermoplastic rubber flexible hose reinforced with wire helix. RFH can be used in numerous applications with excellent results such as oil mist collection. It truly is a general-purpose duct. Some of the uses are light duty dust collection & fume removal. RFH has superior chemical resistance, good abrasion resistance, UV/ozone resistant.

Can be used with a variety of coupling options (not included)

- Most versatile general purpose hose available today
- No cements, glues or adhesives are used in the manufacturing process
- Can handle applications with a wide temperature range
- Superior chemical resistance
- Good abrasion resistance
- Available in metric diameters
- Available with cuffed end finishes
- Available up to 100' lengths

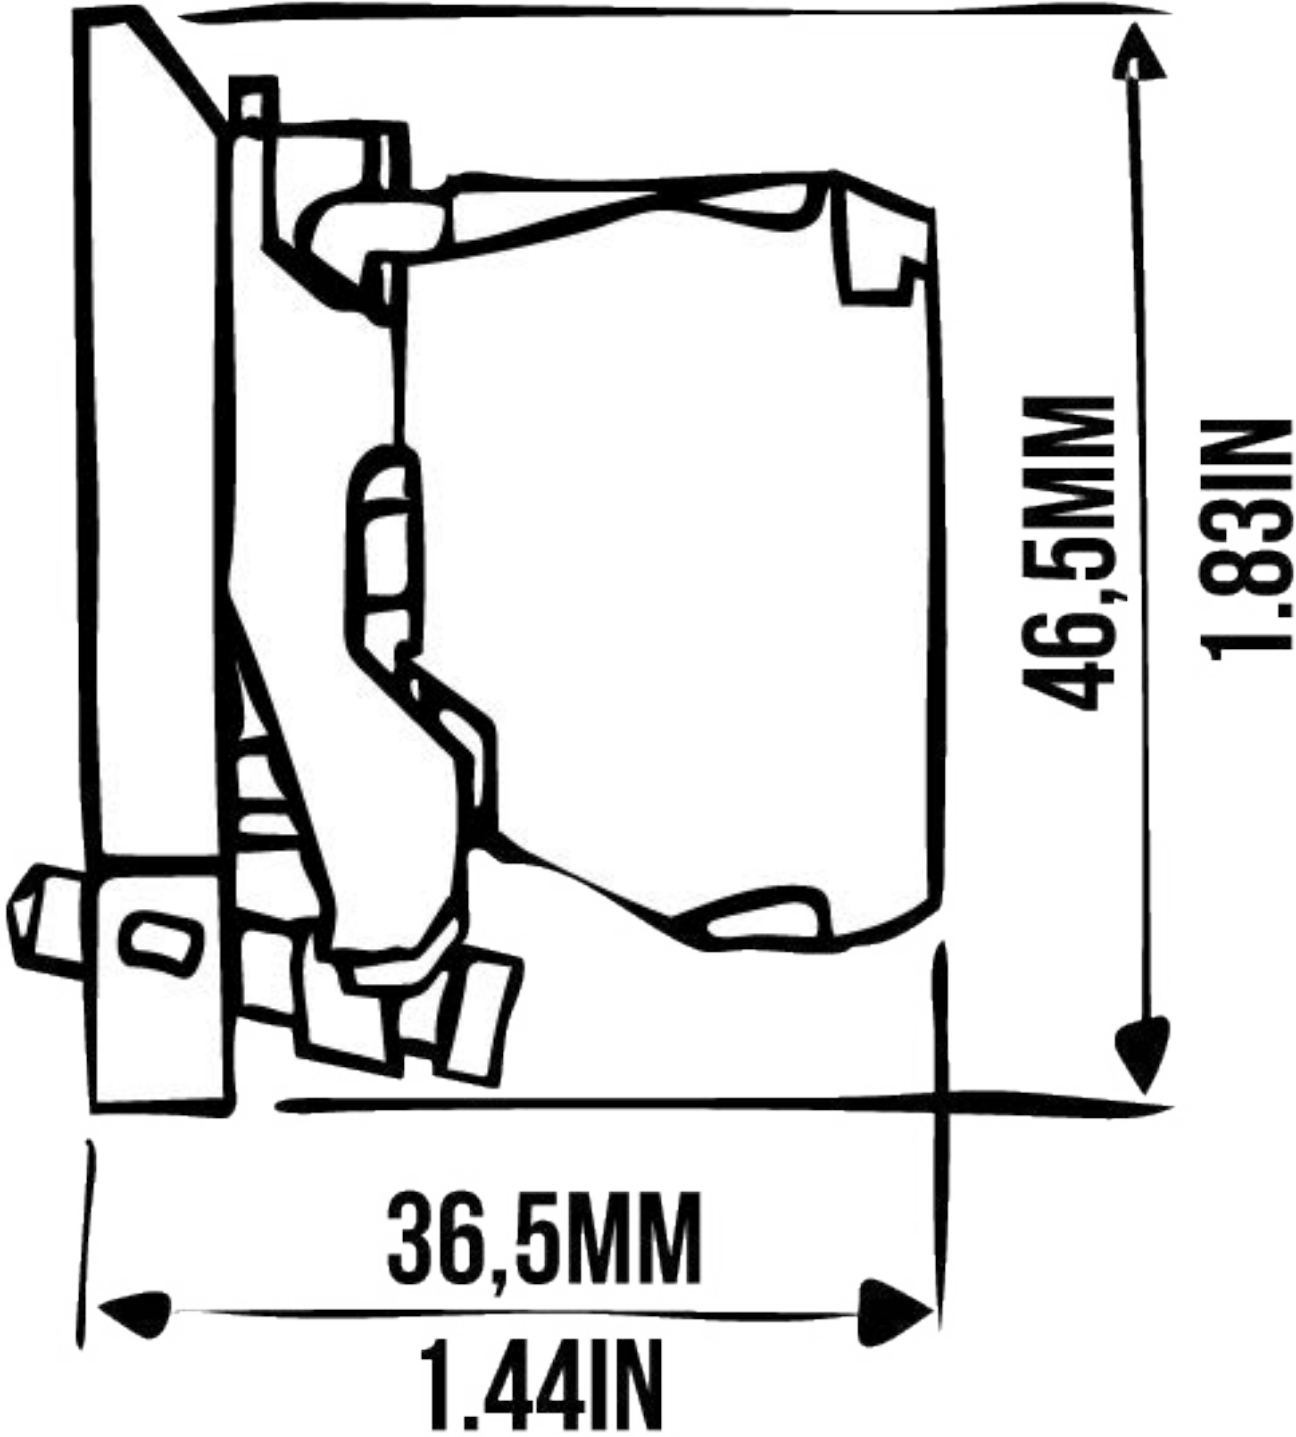

APPLICATIONS:

Air • Chemical Fumes • Chips / Debris / Granules • Dust • Exhaust + Ventilation • General Purpose • Material Handling • Moisture / Hydraulic • Temperature Extremes • Vacuum + Suction

Lagging For Drum Conveyor Pulleys

PPI has complete in-house pulley lagging capabilities. Every step of the pulley manufacturing and lagging process is controlled internally, which assures quality, prompt delivery and competitive pricing of lagged pulleys. Available in a wide variety of styles and thicknesses. lagging is primarily used to improve traction capacity, resist abrasive conditions and extend pulley and belt life. The style of lagging required is usually influenced by operating conditions. While the standard is 60 durometer, it is available in various duro meters, with 45 and 70 being common alternates. SBR is standard: Neoprene and MSHA are available as well as a wide variety of other compounds.

Other lagging is available for specific applications. An example of this is roughtop lagging. This is used for small diameter drive pulleys. It is created by lagging the pulley, but before the rubber is cured, a special mold is applied to cause the grooves to be formed in the lagging. It is then cured with this form in place. It gives excellent traction, without cutting grooves. By forming the groove in the lagging, PPI can offer roughtop on thin lagging, such as 1/4".

Ordering Guide: Superior Idlers

Superior makes ordering easy with a simple number and letter system so you can easily jot down the idlers you need and relay them to our sales staff. Superior manufactures many different styles of CEMA B, C, D, E, and F idlers along with a full line of CB-504 style bearing idlers and rollers. Simply follow the procedure below and you'll be on your way to placing an accurate order.

C5-35

E-36

MOX

TTM

CEMA RATING

(or Series) - Specify either CEMA B, C, D, E, or F.

ROLL DIAMETER

Specify either 4, 5, 6, 7, or 8 for the corresponding roll size diameter.

TROUGHING ANGLE

Troughing angle - Specify either 20, 35, or 45 for the corresponding troughing angle. V-return - Specify either 10 or 15 for the corresponding troughing angle. For standard return and life shaft products disregard the angle.

IDLER TYPE LETTER

Specify the idler identification letter for the particular idler you may need from the list on the right.

BELT WIDTH

Specify either 18, 24, 30, 36, 42, 48, 54, 60, 72, 84, 96, 108, or 120 depending on your CEMA rating.

ROLL STYLE

Specify either "MOX" for Moxie Rolls, "DT" for Double-Tube Idler, or "DX" for DX Idler.

SEAL STYLE

Specify either "WET" for Wet Seal, "DRY" for Dry Seal, "ECO" for Eco Seal, or "TTM" for Titanium Seal.

IDLER TYPE LIST
