B5-35E-48	48", 35°	\$148.80
B5-45E-48	48", 45°	\$148.80

Bullet Proof Bearing Protection

Superior's patented SpinGuard® Seal System is widely recognized as the finest bearing defense system in the industry.

- Stationary external seal prevents material pinch points
- Contact seal creates less drag
- Grease filled triple labyrinth seal

Cost Efficient Interchangeability

Control the expense of replacing the entire idler by retrofitting Superior idlers to competitor stands.

- Slotted shaft fits to most existing frames
- Available hex nut adapter for hex nut brackets and frames
- Bend over tab eliminates installation tools
- Single or double bolt hole mounting

Eliminate Premature Failure

During design, special attention was given to the specific areas of an idler that are prone to extra maintenance and material.

- No pinch points between end stand and outside roll
- Sealed ball bearing

Maintenance Friendly Base Frame

Deigned with maintenance crews in mind, our base is shaped to prevent material from collecting.

- Flared, non clogging end stands provide extra support
- Angled base sheds material

Return Idlers

B4-45EA-36	36"X45°X4"	\$354.51
B5-45EA-36	36"X45°X5"	\$359.19
B5-45EA-42	42"X45°X5"	\$383.76
B5-35EA-48	48"X35°X5"	\$402.48
C5-45EA-54	54"X45°X5"	\$457.47

Eliminate Belt Tracking Issues

End the costly and frustrating maintenance of keeping uncooperative conveyor belts aligned properly.

- Unaligned belt contacts side guide roller or shoe
- Idler pivots and works to bring belt to center

Maintenance Minded Features

Unlike some self aligners, this version is designed with key features to protect belts from additional ripping.

- Urethane side guide rollers are softer on belts as opposed to steel
- Concave-shaped side guide rollers are easy on belting edges

Bullet Proof Bearing Protection

Superior's patented SpinGuard® Seal System is widely recognized as the finest bearing defense system in the industry.

- Stationary external seal prevents material pinch points
- Contact seal creates less drag
- Grease filled triple labyrinth seal

Flexible Sizes and Installation Features

Manufactured with a universal design to allow a better fit on all types of conveyors.

- Available in standard, return or shoe activated styles in both troughing and returns idlers
- CEMA B, C, D, and E
- Available in 20°, 35° and 45° angles
- 1/2" or 5/8" bolts can be used
- Suits applications on both open and covered truss conveyors

Return Idlers - Self-Aligning
